

# ASTRONOCOIN

 The Future Of Portfolio Investment

# WHAT IS BLOCKCHAIN

A blockchain is an open, distributed ledger that records transactions in code. In practice, it's a little like a checkbook that's distributed across countless computers around the world.

Transactions are recorded in "blocks" that are then linked together on a "chain" of previous cryptocurrency transactions.

---

## BENEFITS OF BLOCKCHAIN

This trust is built on blockchain's enhanced security, greater transparency, and instant traceability. Beyond matters of trust, blockchain delivers even more business benefits, including cost savings from increased speed, efficiency, and automation. By greatly reducing paperwork and errors, blockchain significantly reduces overhead and transaction costs and reduces or eliminates the need for third parties or middlemen to verify transactions.

# What is Cryptocurrency?

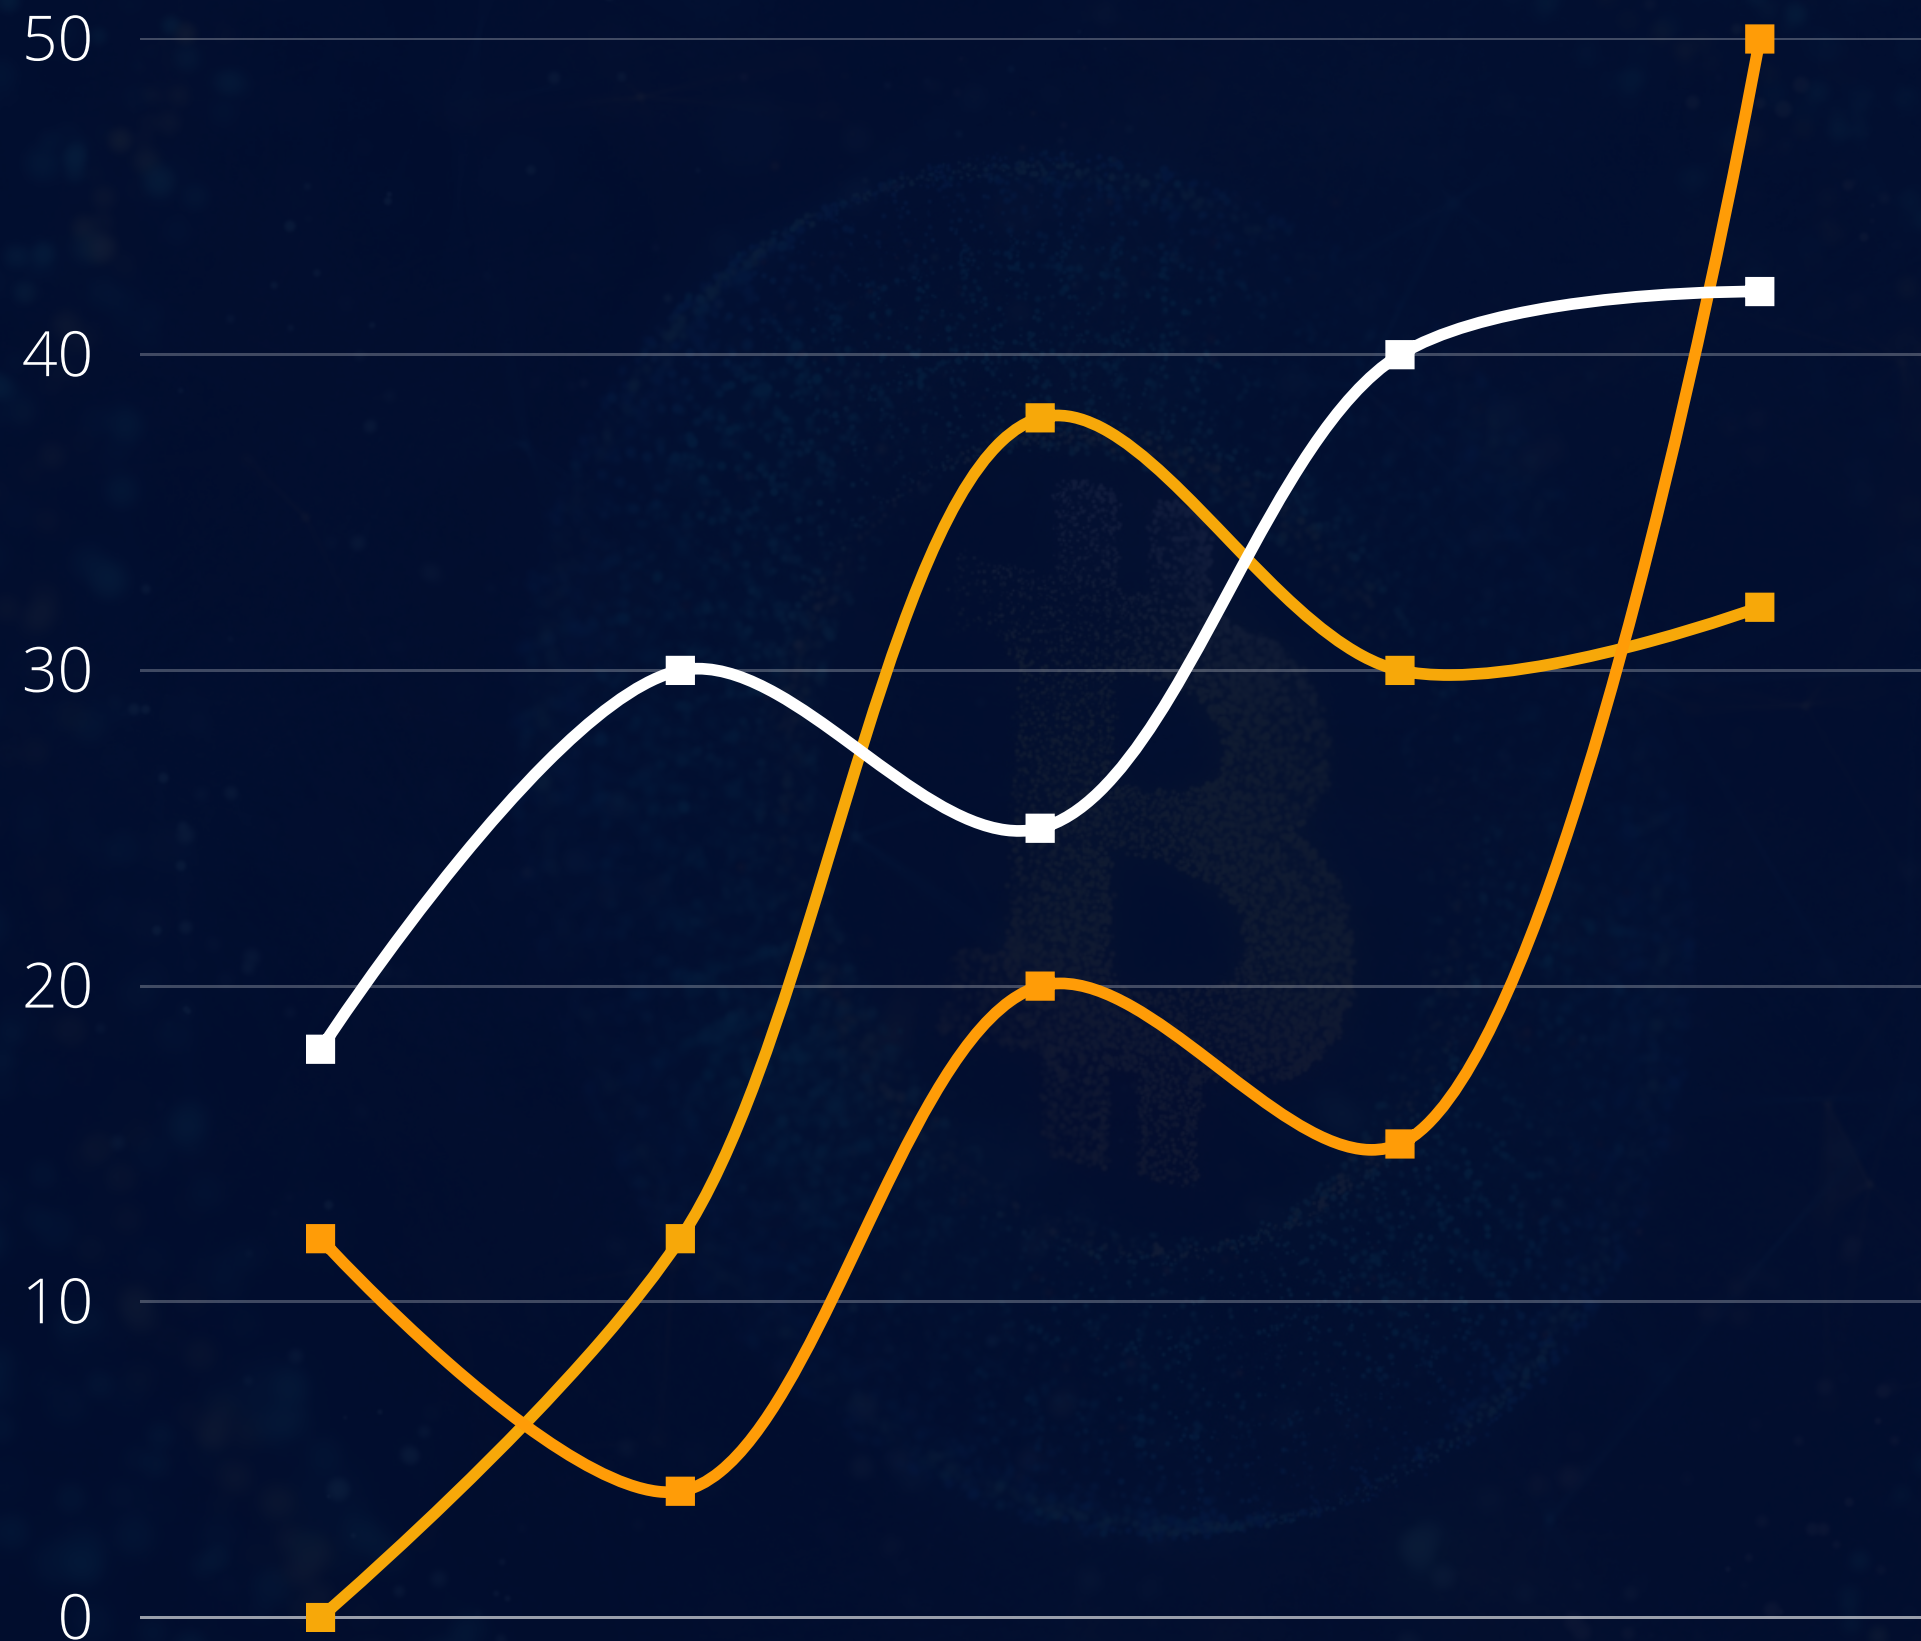

Cryptocurrency is a digital payment system that doesn't rely on banks to verify transactions. It's a peer-to-peer system that can enable anyone anywhere to send and receive payments. Instead of being physical money carried around and exchanged in the real world, cryptocurrency payments exist purely as digital entries to an online database describing specific transactions. When you transfer cryptocurrency funds, the transactions are recorded in a public ledger. Cryptocurrency is stored in digital wallets.

# GROWTH OF CRYPTOCURRENCY 9 YEARS

# BITCOIN PRICE GROWTH SINCE 2013

YEARS	BITCOIN PRICE (\$)	CHANGES (\$)	YEARS-OVER YEARS
2022	47,743	18,351.22	62.44

A group of five business professionals (three men and two women) are gathered around a table in a meeting room. They are all smiling and shaking hands, suggesting a successful collaboration or agreement. The scene is dimly lit, with a dark blue overlay. A laptop and some papers are visible on the table.
