

WHITE PAPER

ASTRONOCOIN

DISCLAIMER

Though we have made forward looking statements in our white paper, all statements made are based upon public historic data

This white paper makes no futuristic statements nor convenes an offer of security not of any investments.

ASTRONO COIN IS A TOKEN NOT SECURITY

This White paper accommodates forward-looking statements that shed light on the substantial risks and uncertainties. All statements, other than statements of historical facts, included in this White paper regarding our strategy, future operations, regulatory process, future financial position, future revenue, projected costs, prospects, plans, strategic relationships, joint venture relationships, objectives of management and expected market growth are based upon future prospects.

NO GUARANTEES OF VALUE

The acquisition of Astrono Coin guarantees no profits or losses. We have diligently followed a sensible strategic approach to our smart contract deployment. However, we hold no guarantees of the future outcomes of our Smart Token.

ASSOCIATED RISKS

The acquiring of Astrono Coin may carry the usual known levels of risks. You should carefully consider the risks prior to making any purchase decisions. The Astrono Coin White paper has commented on historical cryptographic market information but with no relativity of future market of The Astrono Coin. The risk factors in the crypto industry are variable and The Astrono Coin White paper makes no guarantees of success or failure. Due to the competitive nature of the market, we make no guarantees of market share, value, or profit abilities.

ASTRONO COIN ARE NOT AN INVESTMENT

Although we have deployed the Astrono Coin with a positively reasonable conditionality and with the efficacy of relative events, the Astrono Coin is not meant to be investment. With this white paper, we undertake no obligations and responsibilities towards the up and down trends of the Smart-chain. Future events and applicable laws may lead to changes in our expectations, views, and future plans.

ABOUT ASTRONO COIN

Astrono Coin is leveraging many years of successful experience of professionals in various industries to facilitate a distributed technology platform that provides curated and quality-optimized networking systems for every professional across the world. The ASTRONO COIN platform will uniquely combine Artificial Intelligence (A.I.) and blockchain technology allowing for matching individual requirements with professional services, with Astrono Coin eliminating all of the points of friction that exist in today's professional networking ecosystems.

The Tron Smart Chain token, used within the Astrono Coin platform, will power a real-time service to maximize consumers from thousands of international service providers, tokenized payments that eliminate cross border foreign exchange arrange, reduced fraud risk, and the seamless integration of insurance providers in providing.

SMART TOKENS

Smart Tokens based on multiple Smartchain solutions will be the undisputed next generation of the World Wide Web. Why? Because this technology is going to touch all our lives' in the near future, individually and business wise. Think about it, all currencies at the moment are backed by Governments. But are there any currency modules which are truly decentralized and global? Or at least has the potential to replace the existing physical currencies? Yes, there is. And it's called smart tokens or in a layman's term "Crypto Currency".

THE TRON SMART CHAIN

At the moment Tron Smart Chain leads the chart when it comes to trading volume. It is the No.1 Digital Currency Trading Platform. Tron Smart Chain also have their own coin which is doing extremely well with an upward trend. Tron Smart Chain Exchange is also playing its fatherly role by adding millions and helping the crypto industry find global awareness. In recent news, Tron Smart Chain chain is bridging DEFI and CEFI with a 100-million-dollar support fund. Hence the Tron Smart Chain exchange is becoming more and more popular. Moreover, since all digital currency offer limited quantities to increase demand. Saturation of popular digital smart coins and tokens are happening much sooner than anticipated. This saturation is inspiring gigantic upward trends in all cryptographic exchanges. The addition of big named crypto clients such as Elon musk on the bandwagon it is only making it easier for masses to understand and learn how quick adaption to smart tokens will affect everyone in more ways than none.

WHAT IS ASTRONO COIN(TRON SMART CHAIN) FUTURE ASSET?

With further capitalization of the Tron Smart Chain Smart chain, the need for smart contracts and smart tokens have risen for multiple service sectors. The Astrono Coin is being launched to align itself with the growing market of users of Digital Coins and Tokens. Astrono Coin will target the gaming, UI, and utility industry to make smart contracts and smart agreements running on multiple Smart chain ecosystems.

So, what are smart tokens? Smart tokens are based on the revolutionary Smart chain that enables the settlement of contracts and sending of payments over the internet with fixed rules and without a third party.

Smart chain-based Smart tokens are issued to users to help facilitate transactions against services & products

The Astrono Coin will be built on the Tron Smart Chain Smart chain. Like Tron Smart Chain and Bitcoin, Astrono Coin also aims to facilitate services between people and establishments without the presence of any intermediary, and in an extremely cost-effective manner.

If you still don't understand what smart tokens are? Don't worry, no one understood the internet when it was launched in the 90s. A lot of innovation around the internet happened before people actually started to understand what it was. Look where we are now, the same type of innovation is happening again with cryptocurrencies.

The Internet changed the ways of communication. **“The digital currency is going to change the ways of the money.”**

Goals for the Astrono Coin

1. To saturate our 50,0000000 limited supply to achieve scarcity and increase demand.
2. Extend global reach.
3. Connect with a diverse range of channel partners.
4. Steady return of investment (ROI) to stakeholders.
5. Share prosperity and help flourish the Crypto Community

ASTRONO COIN IS “SAFE”

By buying Astrono Coin, you not only get a smart digital currency but you have also unintentionally or intentionally become a part of something great. That something great is the new economic boom of the digital smart token network on the Smart chain ecosystem.

Unlike most physical currencies, the digital-currency is issued according to fixed rules. The real idea behind Astrono Coin was to create a digital currency with a value that couldn't be monopolized or controlled by any central authority. The sooner this rationalization hits the public, the quicker they will draw to use the Astrono Coin against various networks of service. The true value and beneficiary of using our smart token is to be able to reap direct benefits without having to share with any intermediaries

SO WHY WOULD PEOPLE USE ASTRONO COIN?

Because like everything else, even assets are becoming smarter. To give you an example, think of assets in the form of art, music, intellectual property, loyalty points, carbon credits, coupons, etc. Most of these are already digitalized but with a centralized mechanism and without a smart chain. Imagine if all of the above function as digital assets but in a decentralized smart chain platform. Similarly, when we look into the future of smart devices, global data states:

“The number of smart devices will exceed the number of human beings in the very near future. Perhaps as early as 4 or 5 years. The creation of a digital currency network is inevitable.”

The real reason why Astrono Coin will sell like hot cakes is simply that everyone wants to save money. Smart tokens make high transaction fees a thing of the past. Another example that can be understandable relates to is, what name comes to mind when you think of smartphones. Apple, right? Apple was not the company that invented smartphones. In fact, smartphones were pretty much into play 10 years before the launch of the first Apple phone. Compaq, the Palm Pilot, and even Nokia toyed with the idea of smart devices much earlier than anyone else.

In today's age almost all now carry an iPhone or smart device in our pocket, and with pride. We depend upon these devices. Such is the power of the Smart device and such will be the power of the smart currencies capitalizing on these smart devices.

WHAT VALUE DOES THE ASTRONO COIN HOLD?

So, what really makes the Astrono Coin token attractive to its users? Well firstly, being Smart chain, it is not linked to any central authority, thus driving cost-effectiveness. Secondly, it's on the successful Tron Smart Chain Smart chain, effectively adding value to millions of Tron Smart Chain exchange users.

Thirdly, the Astrono Coin is a digitally signed stamped Smart Token. It is following a multi-prong launch broadcast strategy to be put out in the world with lots of noise.

TOP 6 REASONS TO OWN ASTRONO COIN

1. You just invested in something great.
2. You get digital currency in return.
3. You get the first movers' advantage and you are way ahead of the crowd.
4. Our smart tokens will be redeemable with incentives.
5. You will save money on transaction fees.
6. Last but not least, you will become a part of the digital economic boom.

COMMERCE TODAY VS COMMERCE TOMORROW

Commerce today is the spill-over by-product of the last century. It's old and bound to become obsolete soon. To give an analogy, ask someone to trace a transaction conducted 5 years ago. He or she wouldn't be able to do this as that would be a big challenge for that person. It's not his fault. The traceability of paper trail has always been an issue in the current financial centralized sector.

But the new commerce of tomorrow, which is built on a Smart chain, is entirely different from the commerce of today.

It superiorly contradicts the old centralized financial system. And with the world population growing in numbers unimagined, using physical currency that is printed in numbers un- imagined. Because of these unforeseen numbers, the ratios of demand-supply don't match with each other. The biggest case study for the need for smart tokens was brought forward by the financial crisis in Greece. As the shortage of physical currency hit Greece, 1000s of people lined up in front of ATMs to get physical cash. Yes, Greece had no physical cash to give to its people. The existing financial system had failed the people of an entire country.

What will happen if the same phenomenon hits the whole world? What if the physical currency starts failing the whole world? What if there arises a huge shortage of physical cash? What will all of us do? This is why we call cryptocurrency the smart financial revolution. Because the prosperity of digital money will defy the forces of physics to reach everyone and anyone through smart technological Smart chain solutions powered by the internet and governed by decentralization and with no boundaries and no limits.

Hence, it's safe to say the Astrono Coin is on the right track.

ELECTRON SMART CHAINIC TRANSACTIONS & BETTER SERVICES THROUGH ASTRONO COIN

Since the Tron Smart Chain Smart chain technology is fast becoming the native digital medium for recording value as peer to peer. This effectively means that more and more people will start transacting with the Tron Smart Chain Smart chain Technology.

And since these transactions are decentralized without intermediaries, there is no limit for users to conduct business services digitally.

People will be able to transact with anything and everything. A user may book a holiday in a luxurious resort or pay his child's tuition fee. The opportunities are endless.

So now that the central authorities have competition. What can they do? Can they stop this revolution? They cannot. The only thing they can do is to compete with it. But guess who will eventually win this race. The centralization authority who wants to control its people or the people who are seeking decentralization. Let's leave this unanswered for the moment. But you will know soon enough.

PARADIGM SHIFT

Contemplate this. You currently keep your cash in the bank and your gold is in the locker. So the more of either that you have, the more inconvenient it becomes to manage. And how long will this traditional hold-up last?

On the other hand, smart tokens or cryptocurrencies are with you always. They are always on your smart device. It's safe to say that your smart token is always at your fingertips. It will become a utility of value. Unquestionably, the business world in the future is going to run on smart contracts. Peer to-peer consensus mechanism will be the go-to for buying and selling. Crypto currency-based smart tokens will be used in the future for cash. Learn to earn profits and make the smart switch.

THE END OF HOSTILE TRADE PRACTICES

For large transactions, currency can get quite inconvenient. Management of large currencies creates pressure and it's super costly. But thanks to smart tokens, intermediaries will not have their monopoly anymore. Hostile trading practices will become a thing of the past

Core technologies like smart tokens are going to prevail on everything, just like your credit cards and online bank accounts at the moment.

At the moment there is no alternative to the banking system. The last two serious financial crises have established a need for an alternative financial system. Decisive actions are the need of the hour, literally.

ASTRONO COIN IS DRIVEN BY GLOBAL ECONOMIC FACTOR

Our Smart Tokens are largely based on the existing macro & micro economic factors. The crazy undersupply and management of physical currency is causing deflation. The existing global finance and trade of physical currency is likely to diminish in the future. Therefore, as a consequential factor our Astrono Coin, carrying the global macro focus, is likely to flourish and bloom.

Astrono Coin will be the consequential factors of the lack of future currency in the current supply and demand parameters. Consider this, Smart tokens are built to pre-serve the future of the global macro focus. Previously, we could only imagine a world with global decentralized digital currency.

But the beginning of 2021 and the launch of new smart tokens such as Dogecoin has created new realities. News is spreading like wildfire. The rumor mills are at work incessantly. We like to live in our comfort zone. What could be more comforting than holding all your financial value with you, all the time, right where it belongs?

SMART TOKEN VS CORRESPONDENT BANKING

The world we are heading into conducts Astrono Coin transaction and payment verifications without the need of a trusted third party. There is a dramatic cross-border payment gap with services available today. The needs of the growing markets offer a lot of room for financial institutions to grow their bottom line. This goes against the principles of sharing of wealth through prosperity. However, this problem will easily be solved as mainstream acceptance of digital currency and Smart Tokens are picking up quickly and not news anymore. Businesses are converting faster with an unmeasurable velocity of speed. As the frequency of the user experience increases the success chances of this token exponentially increase.

So now that the central authorities have competition. What can they do? Can they stop this revolution? They cannot. The only thing they can do is to compete with it. But guess who will eventually win this race. The centralization authority who wants to control its people or the people who are seeking decentralization. Let's leave this unanswered for the moment. But you will know soon enough.

SMART TOKEN ECONOMY

We have worked on an excellent staking reward system based on the I Tron Block chain With the historical future of Crypto Currencies, the prices of the Tronix Block chain will likely rise over time. This is the next solid passive income strain. Returns are high, as they have been, as they are directly linked to the Tron Blockchain.

Whatever revenue we will get from NFT MARKETPLACE & E GAMING, we will distribute 20% of the revenue among Whitelist

Candidates and top 30 account holders in the form of Goodrich Token.

AIRDROPPED ASTRONO COIN

Astrono Coin free crypto coins will be airdropped into your wallet. Absolutely for free, we are sensitive about the awareness of cryptography, hence we will airdrop crypto coins to you. Look out for free Astrono Coin. Crypto markets are already very active in certain Asian markets. We will airdrop our smart tokens to existing cryptographic markets. This will drive our smart token to become more and more user friendly.

ASTRONO COIN BOUNTY PROGRAM/CAMPAIGN

We have allocated Astrono Coin for various bounty programs and campaigns. We will encourage the community with various tasks. These tasks can be marketing related etc. There are various crypto communities online. We aim to conduct the Astrono Coin Bounty Campaign amongst a variety of communities. These communities will announce.

Our white papers, They will write blogs on our smart tokens. The completion of these public tasks will see you winning rewards in the form of Astrono Coin. The Astrono CoinBounty rewards are directly relative to your work done. For instance, if you wrote a blog on our smart token. The higher the number of views, the higher amount of Astrono Coin. You can create an announcement thread.

ASTRONO COIN TECHNICAL TEAM

The Astrono Coin team for the past 5 years had been consumed with Bitcoin.

Although cryptographic trends are mostly hyperbolic. All our computation assumptions on our smart tokens have been technically qualified by the application of long term historical cryptographic data measurements. Our technical team is highly qualified and extremely motivated. They are inspired by historical trends that have brought the crypto currency to where it is now. Safe to mention that we have been studying this market and its trends for many years. We are now sure of the Smartchain opportunities and hence we are deploying our smart tokens to offer solutions to any and all complex scenarios. Our technical team has already invested 1000s of technical hours to assure we will achieve all technically measured assumptions.

ASTRONO COIN REVOLUTION

Data is readily available. We will write contracts on this data on the Smartchain using the Smartchain mechanism. The outcome of the smart contracts will be established. And they will be secured as these smart contracts are built on Smartchain. Mixing these smart contracts with the real world may be a challenge at the moment. However, the earlier first mover advantage will go to those with a more futuristic vision considering the historical cryptographic data available to all of us at the moment. The new cryptographic ecosystem is being built around global markets and will continue to expand exponentially considering its future value. A decentralized most highly audited smart service system will be the attraction of many, including institutions and business owners.

Our smart token aims at the diverse new cryptographic ecosystem. There is already a huge cryptographic market. Mauritius as an example, they aim to become 100% run on block chain. Mauritius as you all know has one major industry, and that is the gaming UI utility industry.

TARGETING STEADY GROWTH

So where are we today and how far have we come. This is still very much the beginning. You can buy a Nissan Daytona in a US with a dogecoin. Won't be long when you will be able to buy Tesla cars with bitcoin. Dealerships in USA are already selling cars using bitcoin. Welcome to the future. The auto industry is transforming, and other industries will follow. There are serious gains to look forward to in our industry.

It's the right time to become a part of the financial revolution of the future. Although the cryptographic industry is much built-in volatility. However, the Astrono Cointoken will target steady growth. We are setting growth protocols and parameters based on the existential data with futuristic calculations.

ASTRONO COIN (TRON SMART CHAIN) SUPPLY DEMAND ECONOMICS

- What does the Law of demand and supply state: It states, "High demand and low supply for increased rate?"
- With this formula the Tron Smart Chain coin supply is limited to 170 million, and the Astrono CoinToken supply is limited to 100 million.
- Today you may invest less than 1 cents to buy our smart token and it may seem of low value to you.
- But if we succeed, and succeed we will. Imagine the value of wealth creation in multiples.
- To invest in a targeted price rise of 170% will make your 0.05 cent investment quite worthy.
- In fact, you will be wishing you would have bought more of the Astrono Coin.
- But let's not get greedy. We want you as our long-term partners. You will grow with us, and so will your investments.
- We are on the Tron Smart Chain ecosystem. Tron Smart Chain has positioned its exchange for users extremely

PAYMENT GATEWAYS & SMART

The Astrono Coin can be kept on any smart-chain wallets. Users can easily add our smart tokens to their existing smart-chain wallets.

TARGET USER

We are targeting all smart-chain users and enthusiasts, however below are a few of our target segments:

1. Different Smart-chain Protocols
2. Different Smart-chain Wallets
3. Merchants
4. Sole Traders of Crypto Currency
5. Facilitating Businesses & Institutions
6. Individual Transaction Facilitators

HOW IT WORKS

For Developers

The ASTRONO COIN platform provides a set of tools so that developers can focus on creating premium dapps while the platform takes care of the rest. For the platform's services, the developer will pay a small percentage of the their Dapp's operating income. Developers are encouraged to devise new ways to engage community members and provide incentives through clever economy design

ASTRONO COIN token holders are the core of the ASTRONO gaming platform. Every Dapp hosted on the gaming platform will share a portion of the Winnings with Astrono Coin holders through the "Tron Smart Chain Drop." The Tron Smart Chain Drop will take place every day and incentivize ecosystem participants. The amount of BEP distributed to each user will be proportional to the amount of Astrono Coin power they hold. Participants receive Astrono Power for staking their Astrono Coin This mechanism will aggregate more activity on the platform and continue to increase the value of Astrono Coin.

More details about the Astrono Coin Drop system will be released in the future. The team believes this broad token distribution mechanism will help grow a vibrant community engaged with the platform's growth, partnerships, governance process, and more.

ASTRONO COIN NETWORK

Through Astrono Coin, our network of professionals is expected to be the largest in the world. The brand provides a premium offering, ranging from editorial content disseminated through mobile, social media, online, and print platforms to a highly curated professional discovery platform.

Goodrich provides an unparalleled reach, connecting professionals to a highly curated network of top doctors, lawyers, research centers, and professionals of various other fields.

"It's not who you know. It's who knows you."

Today Goodrich is also a recommended body, supported by various top advisors around the world, demonstrated outstanding performance in digital networking through areas such as leadership, technological innovation, customer service, and consumer feedback. Goodrich has strong relationships with all the regional networking groups, reaches professionals globally, and facilitates the process of connecting people.

TRON SMART CHAIN TOKEN ADVANTAGE

Smartchain technology enables several key benefits to the ASTRONO COIN solution. The unique features of Smartchain driven smart contracts allow speed, verification, security, and permanence that would be otherwise cost-prohibitive to implement with legacy technology.

ASTRONO COIN is offering Tron Smart Chain tokens to the public for future use in the platform. The following is the purpose of the token, to be integrated into the roadmap and subject to regulatory approval:

1. A consumptive use token for users to access features within the platform.
2. A loyalty token to reward users who participate in the platform, contributed to them when they perform certain activities in the ecosystem.
3. A medium of value exchange allowing providers to invoice their services in Tron Smart Chain tokens.
4. A store of value, allowing providers to retain credits in the Tron Smart Chain platform.

The Tron Smart Chain storage vehicle will be a modular open-source instrument that allows users to store tokens. ASTRONO COIN will not hold user tokens or the private keys to the tokens. A platform-specific token enables several necessary advantages:

- Can be used as a verifiable method to access discounted services and to transfer value.
- Fair initial distribution and balanced long-term incentives reward those who use and contribute to the ecosystem.
- Creation of a community that believes in the future of better professional networking via an automated and distributed Astrono Coin platform built together for everyone.

WHAT IS THE USE OF TRON SMART CHAIN TOKENS?

- Access to AI-driven service matching recommendations
- Internal payment for services between platform stakeholders
- Cross-border payments for professional services
- Community incentivization to develop the ecosystem

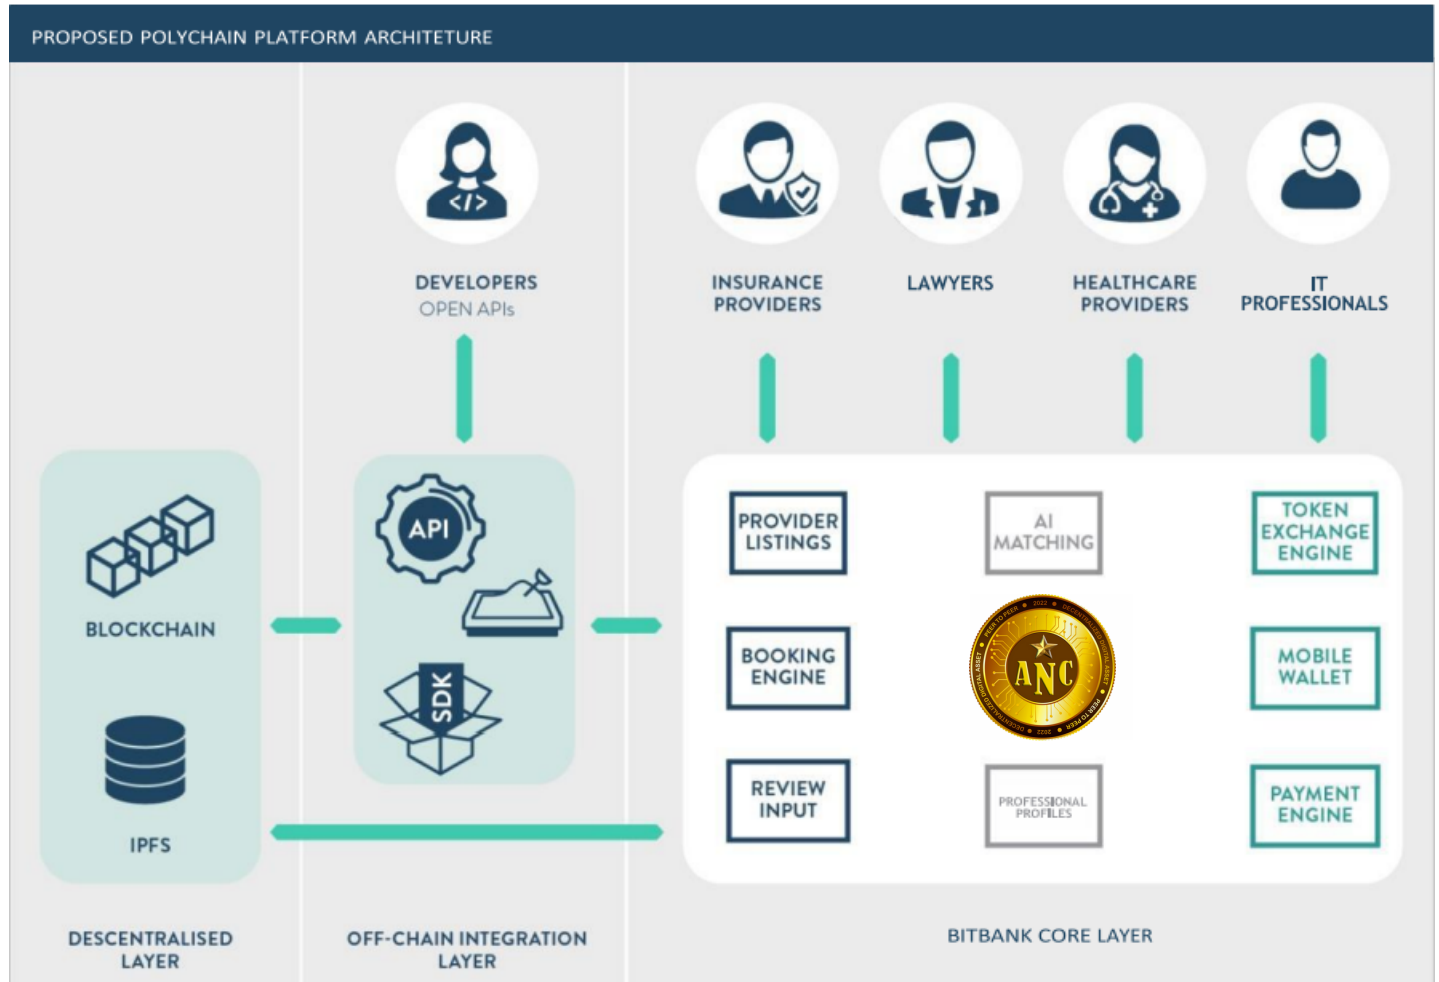

TRON SMART CHAIN TOKEN VALUE GROWTH

ASTRONO COIN will provide an easy-to-use method of purchasing Tron Smart Chain tokens by creating our own fiat token exchange portal and making the Tron Smart Chain token available on high-quality cryptocurrency exchanges.

Services from professionals on the Astrono Coin platform will be exchangeable for Tron Smart Chain Tokens and Astrono Coin will exchange fiat for Tron Smart Chain tokens accumulated by professionals. These Tron Smart Chain tokens will then be offered for purchase via nominated token exchanges and/or via a dedicated token exchange portal.

ASTRONO COIN PLATFORM & TOKEN USAGE

Astrono Coin will expand its existing technology architecture to include modules that enable the functions required for consumers and professionals

ASTRONO COIN PLATFORM

Represents the collective components that comprise the Astrono CoinCore layer, O-chain Integration layer, and the Decentralized layer that enable the capabilities powered by the Tron Smart Chain Token.

ASTRONO COIN CORE LAYER

Contains the proprietary modular components required to enable the Consumer journey

Consumers access functionality via an easy-to-use mobile app, available in multiple languages. Service providers can integrate their existing Customer Relationship Management (CRM), Electronic transaction Records, and/or Enterprise Resource Planning (ERP) systems through open Application Protocol Interfaces (APIs).

OI-CHAIN INTEGRATION LAYER.

Owned and managed by Tron Smart Chain. Used to present connectivity and development options that are not needed to be stored in the Smartchain and to provide an API endpoint to easily access and embed data from the ecosystem via any compatible website or application

DECENTRALIZED LAYER

Used to permanently store information on the Smartchain and to transparently automate permission-driven data sharing, validated reviews, incentivization, and the payment layer of the ecosystem, while storing larger quantities of data on the Inter Planetary File System (IPFS).

TOKEN DISTRIBUTION

Token Name: Astrono Coin

Ticker Name: ANC

Blockchain: Tron smart chain

Total Token Supply: 50,00,00,000

Token Value: Dynamic

The fixed supply of the Tron Smart Chain token is ninety-two billion, which is defined in a cryptographically binding smart contract and is the sole medium of exchange for products, services, and/or incentives within the Astrono Coin ecosystem.

ECOSYSTEM

Effective on-chain governance requires new technology such as DAOs, cryptographic voting systems, and collaboration interfaces to be built, maintained, and updated. The Astrono Coin platform will take on this responsibility, and provide highly effective tools for DApp developers to utilize within the Astrono Coin gaming ecosystem.

As a result, developers will be able to focus on creating premium DApp experiences, while allowing Astrono Coin to take care of the platform, system, ecosystem development, and maintenance. If all goes well, the community will be the greatest benefactors from this system. Users will be able to select from blockchain's most premium gaming experiences straight from their web browser, and rest assured that their cryptocurrency is safe in an ecosystem built by an experienced engineering team and rigorously tested to be safe and secure.

Astrono Coin will build this ecosystem through a process of constant self-assessment and development. Additionally, on-chain governance will be used to target and fund improvements. The community will have as Astrono Coin say on which projects they want to see completed before updates are then launched on the network. The Astrono Coin gaming ecosystem will also include the Following support.

WHITELIST

Developers that join the ecosystem will be able to access the latest SDK, APIs, and technology documents needed to connect to the ecosystem.

The portal would also include a set of tools for developers to utilize the Smartchain, reward pools and mining systems, social features, identity management systems, wallets and more. This set of tools will allow both experienced and inexperienced developers alike to streamline their development process and bring users the best gaming experience possible.

COMMUNITY

The community will be based off the existing Astrono Coin community which currently has over 16,000 engaged players.

We understand the importance of social components in gaming, so there are quite a few major updates in the works. Over the next year, the development team will roll out a revamped account creation system, a new chat system, friends list, gift exchange, and more. Our goal is to foster a sense of community where users can come together to share ideas about gaming, crypto, or whatever else they want to discuss.

ASTRONO COIN ROADMAP

TEAM

Together, the team behind Astrono Coin has decades of experience in gaming, Smartchain, and numerous other industries. We are united by our passion for Smartchain technology and how it could revolutionize the gaming industry

with members coming from teams all around the world, and this. Is a truly global project. 3 of the 11 team members come from gaming and product management backgrounds, whereas the other four are blockchain veterans, participating in the industry as developers in addition to operations and business development managers. Several team members on the gaming side also had a hand in developing and delivering top mobile gaming content, and we're excited too announce that these same people developments of our token.

our development team is incredibly grateful for the opportunity to create this product for the millions of blockchain enthusiasts around the globe. We are confident that we're the best team for the job, and will continue to add top talent to ensure the platform's success.

DISCLAIMER

This document is for informational purposes only and does not constitute an offer or solicitation to sell shares or securities in Astrono Coin or any related or associated company. Any such offer or solicitation will be made only by means of a confidential offering memorandum and in accordance with the terms of all applicable securities and other laws.

The information set forth in this White Paper may not be exhaustive and does not simply list any elements of a contractual relationship. The content of this White Paper is not binding for Astrono Coin and its affiliates and Astrono Coin reserves the right to change, modify, add, or remove portions of this White Paper for any reason at any time before, during, and after the sale of Astrono Coin tokens by posting the amended White Paper on the website. This White Paper does not constitute any investment, legal, tax, regulatory, financial, accounting, or other advice, and this White Paper is not intended to provide the sole basis for any evaluation of a transaction on acquiring of the Astrono Coin tokens.

Prior to acquiring the Astrono Coin tokens, a prospective purchaser should consult with his/her own legal, investment, tax, accounting, and other advisors to determine the potential benefits, burdens, and other consequences of such transaction. Nothing in this White Paper shall be deemed to constitute a prospectus of any sort or a solicitation for investment, nor does it in anyway pertain to an offering or a solicitation of an offer to buy any securities in any jurisdiction. This document is not composed in accordance with, and is not subject to, laws or regulations of any jurisdiction which prohibits or in any manner restricts transactions in respect of, or with use of, digital tokens. The Astrono Coin token is not a security, commodity, or any other kind of financial instrument and has not been registered under the Securities Act of 1933, the securities laws of any state of the United States of America or the securities laws of any other country, including the securities laws of any jurisdiction in which a potential token holder is a resident.

The Astrono Coin tokens are not being offered or distributed to, as well as cannot be resold or otherwise alienated by their holders to, citizens of, natural and legal persons, having their habitual residence, location, or their seat of incorporation in the country or territory where transactions with digital tokens are prohibited or in any manner restricted by applicable laws or regulations. If such a restricted person purchases the Astrono Coin tokens, such restricted person has done so on an unlawful, unauthorized, and fraudulent basis and in this regard shall bear negative consequences. Astrono Coin neither offers nor distributes the Astrono Coin tokens nor carries on a business (activity) in any regulated activity in countries and territories where transactions in respect of, or with use of, digital tokens fall under the restrictive regulations or require from Astrono Coin to be registered or licensed with any applicable governmental authorities.

Each purchaser of the Astrono Coin tokens is reminded that this White Paper has been presented to him/her on the basis that he/she is a person into whose attention the document may be lawfully presented in accordance with the laws of the purchaser's jurisdiction. It is the responsibility of each potential purchaser of the Astrono Coin tokens to determine if the purchaser can legally purchase the Astrono Coin tokens in the purchaser's jurisdiction and whether the purchaser can then resell the Astrono Coin tokens to another purchaser in any given jurisdiction. Certain statements, estimates, and financial information contained in this White Paper constitute forward-looking statements or information. Such forward-looking statements or information involve known and unknown risks and uncertainties which may cause actual events or results to differ materially from the estimates or the results implied or expressed in such forward-looking statements or information.

The English language White Paper is the primary social source of information about the project. The information contained in English language White Paper may from time to time be translated into other languages. In the course of such translation, some of the information contained in the English language White Paper may be lost, corrupted, or misrepresented. The accuracy of such alternative communications cannot be guaranteed. In the event of any conflicts or inconsistencies between such translations and the social English language White Paper, the provisions of the English language original document shall prevail

UPCOMING PROJECT

Astrono Coin would like to thank everyone for showing interest in our whitepaper. In this way, we have given to the outlining of our purpose, vision, business strategy. More importantly we have highlighted our organization's commitment towards users, partners as well as investors.

Once again, we sincerely thank you for your interest in our whitepaper.
